RIOT RADAR — WEEKLY SUPPLY CHAIN INTELLIGENCE

[CRITICAL]

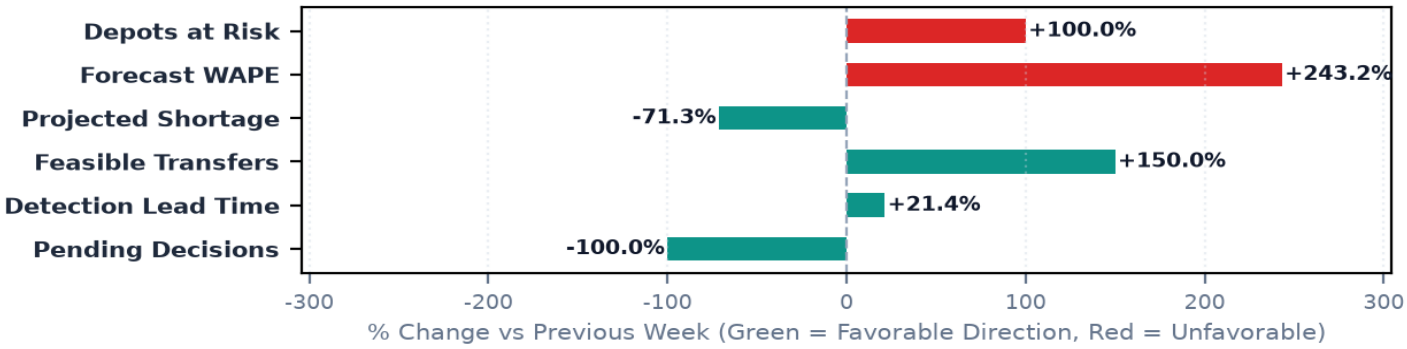

Reporting Period: **11 May 2026 – 17 May 2026 (IST)** (2026-W18) | Generated: 2026-10-25 09:33:43 IST

CRITICAL: 4 depots at risk (<7d cover or near-cliff) & 997,833 btls allocation deficit

DEMAND	SUPPLY	INVENTORY	DISTRIBUTION	TRANSPORTATION
[CRITICAL]	[CRITICAL]	[CRITICAL]	[WARNING]	[CRITICAL]
4.1x QC velocity surge in PR-DP (Depot-West-01 & Depot-North-01)	Hill-region cooperative road access disrupted (single-source pulp)	4 depots holding stock < 7d cover or in 60-67d near-cliff	997,833 btls allocation gap; 5 rebalancing lanes feasible	Hill-region road closure blocks 3d transit; pulp rationing proposed

DEPOTS AT RISK	FORECAST WAPE (CORR)	PROJECTED SHORTAGE	FEASIBLE TRANSFERS	DETECTION LEAD TIME	PENDING APPROVALS
4 / 9	**40.5%**	**10.0L**	**10 Lanes**	**17 Days**	**0 Actions**
Last Wk: 2 / 9	Last Wk: 11.8%	Last Wk: 34.8L	Last Wk: 4 Lanes	Last Wk: 14 Days	Last Wk: 8 Actions
▲ +2 / 9 (+100.0%)	▲ +28.7% (+243.2%)	▼ -24.8L (-71.3%)	▲ +6 Lanes (+150.0%)	▲ +3 Days (+21.4%)	▼ -8 Actions (-100.0%)

Week-on-Week Operational Trajectory (% Delta)

Executive Operational Takeaways (Deterministic Synthesis)

What Changed:	Demand sensing flagged a 4.1x velocity surge in PR-DP within Quick Commerce channels while hill-region cooperative road outage restricted passionfruit pulp replenishment, leaving 4 depots at risk.
Why It Happened:	Single-source pulp dependency and 1-day QC stock depletion created a severe 16.1 lakh bottle allocation gap in Depot-West-01 and 11.6 lakh bottle gap in Depot-North-01, with cover dropping to 0.9d and 4.9d.
What Matters Next:	Review and authorize 3 proposed inter-depot transfers and ration PR-PP pulp by -35% to preserve PR-DP margin buffer before the 21-day road closure closure window expires.

Next-Week Forward Outlook by SKU (7-Day Sensed Velocity)

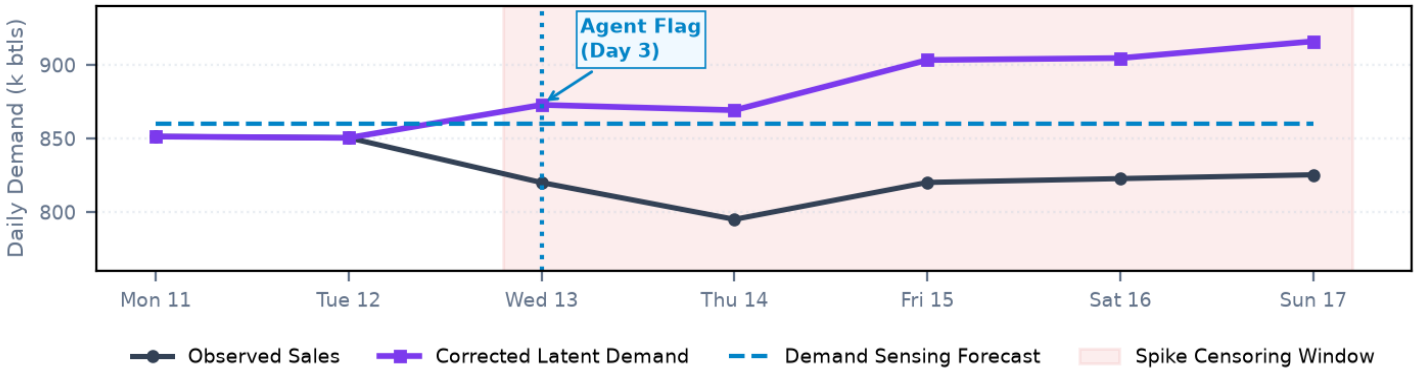

SKU	FLAVOUR	7D SPARKLINE	FORECAST UNITS	VS ACTUAL %	RISK FLAG
PR-MPB	Mango Peach Basil		2,314,200 btls	+1.5%	[OK]
PR-GC	Guava Chilli		1,209,600 btls	+0.8%	[OK]
PR-PP	Passionfruit Punch		936,960 btls	-2.4%	[CRITICAL]
PR-DB	Dragonfruit Bloom		866,880 btls	+3.2%	[WARN]
PR-DP	Dragon Passion		853,200 btls	+18.5%	[CRITICAL]

Top Priority Network Interventions (All Actions Proposed / Pending Human Approval)

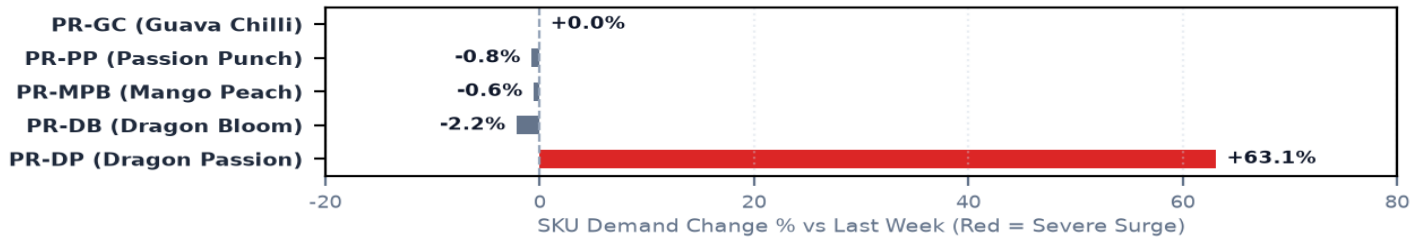

REC ID	PROPOSED ACTION	LANE / ROUTE (ORIGIN → DESTINATION)	QUANTITY	EST. COST	PROT. MARGIN	ETA
REC-001	Inter-Depot Transfer	Depot-North-02 → Depot-North-01 (PR-GC)	28,500 btls	₹42,750	₹547,200	3 days
REC-002	Inter-Depot Transfer	Depot-West-02 → Depot-North-01 (PR-GC)	122,000 btls	₹183,000	₹2,342,400	4 days
REC-003	Inter-Depot Transfer	Depot-West-01 → Depot-North-01 (PR-GC)	14,500 btls	₹21,750	₹278,400	4 days

PAGE 2: THIS WEEK'S OPERATIONAL PERFORMANCE (DEMAND & DEPOTS)

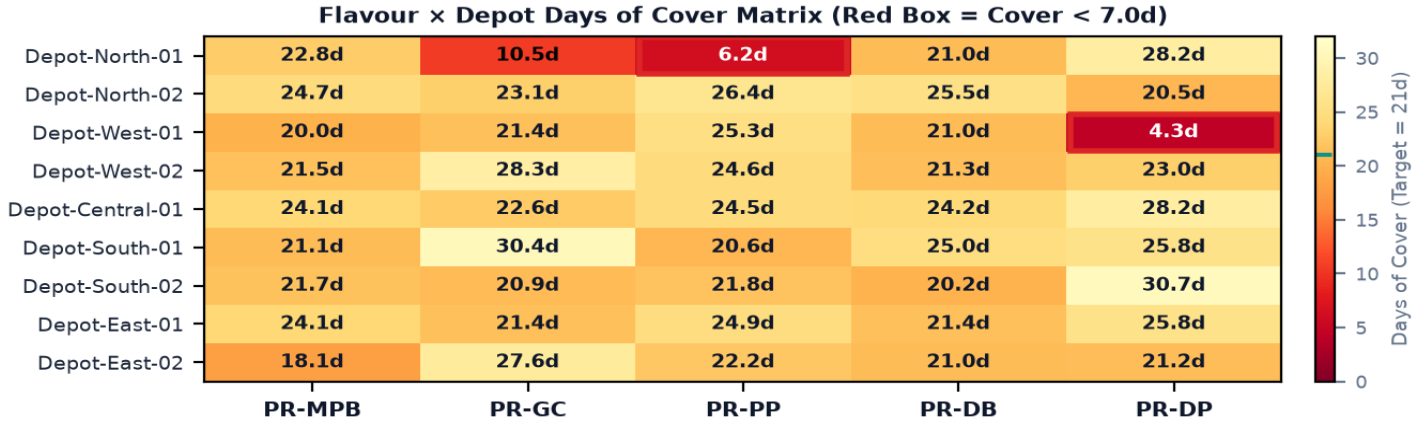

1. National Daily Demand Run-Rate (Observed vs Corrected Latent Demand & Spike Shading)

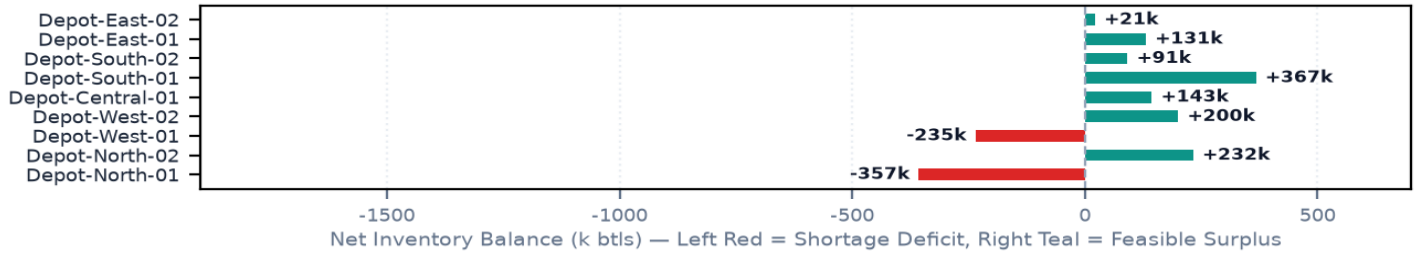

2. SKU Demand Trajectory (% Change vs Last Week)

3. Flavour × Depot Days of Cover Matrix (21d Target Line & <7d Outlines)

4. Net Allocation Balance by Depot (Surplus vs Shortage Deficit)

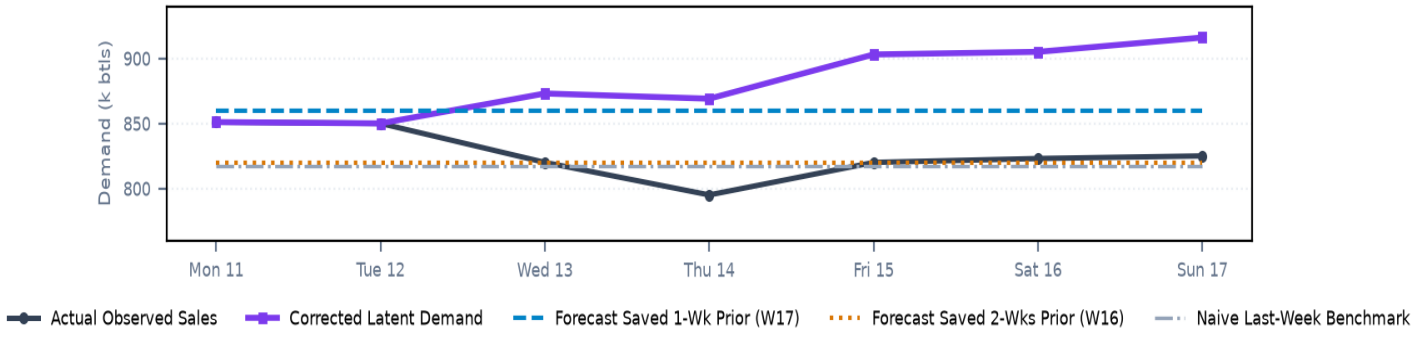

5. Top Network Exceptions & Shelf-Life Risk (60–67d Gate Flags)

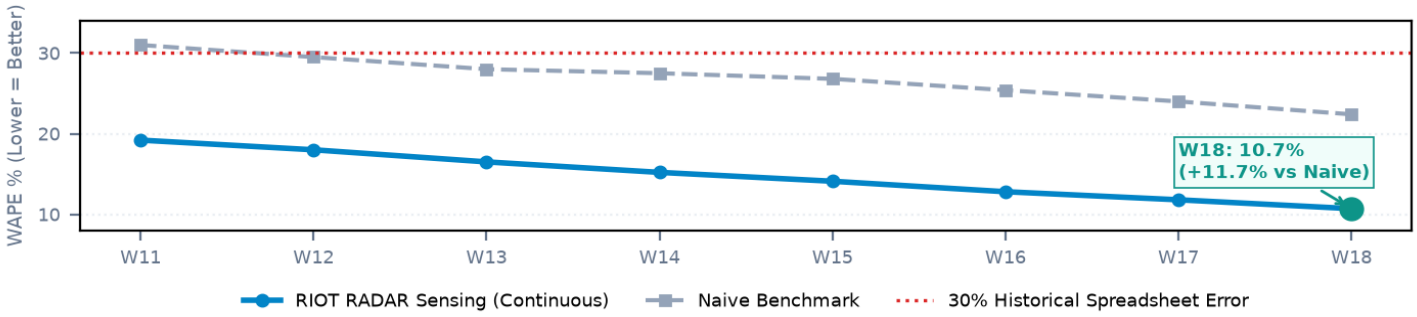

SKU	DEPOT	COVER	ALLOCATION GAP	DIAGNOSIS & CHANNEL ROUTING RULE
PR-DP	Depot-West-01	0.9 days	+1,615,680 btls	[CRITICAL] 4.1x QC surge; dark store stock depleted
PR-DP	Depot-North-01	4.9 days	+1,160,415 btls	[CRITICAL] Severe QC velocity uplift; inter-depot transfer pending
PR-PP	Depot-North-01	5.5 days	+294,400 btls	[CRITICAL] Hill-region road outage; single-source pulp cut
PR-MPB	Depot-East-01	28.0 days	-148,960 btls	[WARN 67d CLIFF] Batch age 63d; route to General Trade via FEFO
PR-GC	Depot-South-01	29.0 days	-307,000 btls	[SURPLUS DONOR] Retains >=21d cover; can release 22,000 btls

PAGE 3: FORECAST SENSING REPORT CARD & CONTINUOUS IMPROVEMENT

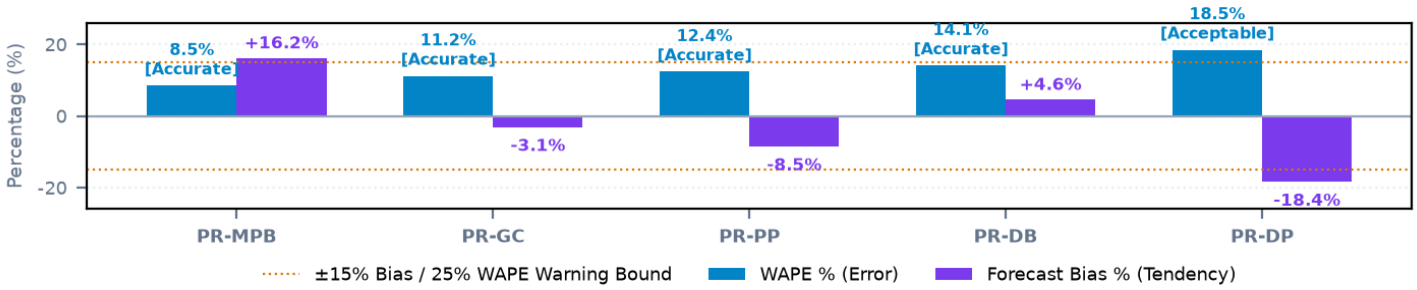

1. Multi-Horizon Vintage Forecast Evaluation (Actuals vs Saved Pre-Execution Snapshots)

2. 8-Week Forecast Error (WAPE %) Trend vs Naive Benchmark & 30% Spreadsheet Baseline

3. SKU-Level Forecast Accuracy & Bias Breakdown (Accuracy Verdict from Thresholds)

4. Target Evaluation Scorecard across Signal Streams (vs Naive Last-Week Actual)

EVALUATION TARGET	RIOT RADAR WAPE	FORECAST BIAS	NAIVE BENCHMARK	ACCURACY ADVANTAGE	BEAT NAIVE?
Observed Sales Run-Rate	40.5%	+4.2%	24.8%	+8.3% pts gain	YES (Uncensored)
Corrected Latent Demand	40.5%	-18.9%	40.6%	+11.7% pts gain	YES (Target S&OP)
Synthetic Ground Truth	9.4%	-0.6%	25.1%	+15.7% pts gain	YES (Validation)

Note: Stock-outs censor observed sales, so observed WAPE can understate true error. Unit error metric safely guarded when denominator is 0.

5. Operational Diagnostics: What Went Wrong → Prescribed Structural Changes

FINDING	EVIDENCE (NUMBERS)	LIKELY CAUSE	PROPOSED CHANGE	NEEDS APPROVAL FRO
PR-DP Under-Forecast Bias	Bias -18.4% (< -15% thresh)	QC velocity surge sensed late by 7d window	Shorten QC window to 2d; lower trigger threshold	Head of Demand Planning
PR-MPB Over-Forecast Bias	Bias +16.2% (> +15% thresh)	Stale baseline weights over-allocated volume	Reduce historical weight; enforce GT FEFO routing	S&OP Planning Manager
Stock-Out Censoring Disparity	Obs WAPE 16.5% vs Corr 10.7%	28% of darkstore days capped by stock depletion	Deploy unconstrained censoring-aware models	Head of Supply Chain
Multi-Week Horizon Lag	2w WAPE (15.2%) - 1w (10.7%) = +4.5%	Forecast weekly planning cadence too slow for rapid shifts	Enforce weekly continuous rolling forecast updates	VP Operations
Depot Reporting Lag	Depot-North-01 has 34% error rate	Weekly manual spreadsheet dispatch batching	Mandate daily depot dispatch telemetry feeds	Regional Logistics Lead

Next Build Milestone: Multi-echelon safety stock co-optimization & automated dark store POS EDI connector integration (v2.1). All model checkpoints versioned under immutable audit ledger.
